OVERVIEW

New apartment with sea view, 3 bedrooms, 2 bedrooms walking distance from beaches of Benidorm Poniente.

There is no better way to start the day than waking up every morning breathing in the Mediterranean Sea air, immersing yourself in Benidorm's unique environment and strolling along its golden sandy beaches.

This new building will be delivered at the end of 2023 and will offer you all this and much more: luxury apartments with terraces with exclusive sea views and an emblematic architectural design that blends in with the city's identity.

It will benefit from the best finishes and the finest attention to detail. Everything is designed for maximum comfort living. Rooms brimming with luxury, ample spaces and top level equipment.

This very nice apartment of 85.28 sqm and terrace of 20.98 sqm is situated at the 32nd floor of the tower. This flat includes a living room and an open space kitchen of 32.37 sqm, 3 bedrooms of 14.35 sqm, 11.27sqm and 10.07 sqm and 2 bathrooms.

You will enjoy a terrace of 20.98 sqm facing the living room and the master bedroom.

Inside the apartment, the floor tiling is porcelain stoneware imitation marble with underfloor acoustic insulation. Outside, you will find porcelain stoneware flooring for more durability, easy cleaning and maintenance and light colours to lower the temperature.

The kitchen is fully equipped with high and low cabinets, drawers and doors with auto-brake system, a quartz agglomerate worktop (Silestone, Compac or similar brand) and appliances by Smeg. There are TV sockets in the living room, all the bedrooms, the terrace and the solarium, RJ45 data and telephone sockets and the property benefits from fiber optics as well as the pre-installation of community Wi-Fi network service with internet access in the common areas of the complex.

The joinery is in aluminium with thermal break double glazing with solar control (UV and infrared filters). There is a thermal and acoustic insulation and a solar filter protects the furniture from discolouration by the sun, and prevents the infiltration of heat, allowing greater savings in the air conditioning of the home.
