Excellent new 3-bedroom apartment with a terrace for sale in La Seu

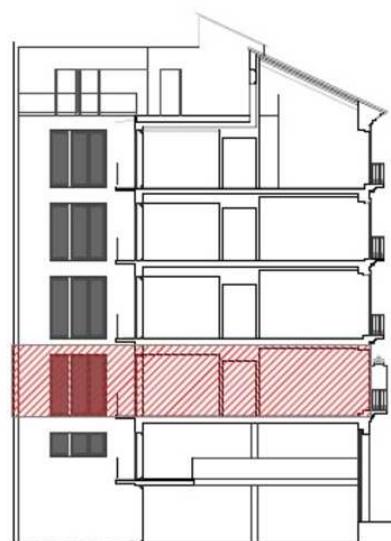

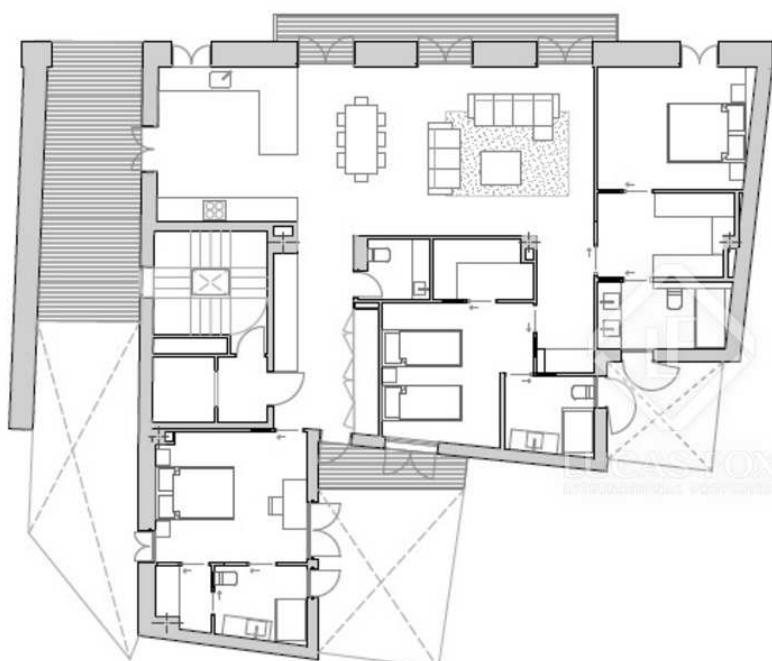

Spain » Valencia » Valencia City » La Seu » 46003

3	4	197m²	31m²
Bedrooms	Bathrooms	Floorplan	Terrace

OVERVIEW

Large, superbly renovated property with the best quality finishes, located in a 19th century building that has been completely renovated, in the most stately neighbourhood of Ciutat Vella.

This exceptional apartment of 197 m² is part of a new development on Plaza de Cisneros, in La Seu, in the heart of Valencia. It is a nineteenth century building that has been completely renovated and still features the majestic original façade. The building is a good example of the residential architecture of the 19th century produced within the walls of the city, after the disappearance of religious and noble properties. A unique feature of the building is that it absorbed a little alley, which is now the single storey entrance of the building, which is accessed by a large wooden door, typical of these buildings.

This particular property is located on the second floor of the building. As there is only one dwelling per floor, all residents will enjoy great privacy and tranquillity. The apartment has a built area of 197 m² with common elements and has 4 large balconies covering a total of 13 m² and a large terrace of 18 m² overlooking the square.

Upon entering the apartment we find a hall with lined closets, followed by a guest toilet. The day area is spacious and enjoys marble floors and 3 large windows with balconies. The kitchen can be open to the living-dining room or closed in a separate space, as the buyer prefers, and will have a window and a door-window with access to the terrace. The kitchen will be Siematic or similar, and will include state-of-the-art appliances, such as a self-cleaning digital oven, an extractor fan, an induction hob, a microwave with grill and a large fitted fridge; all in stainless steel finish by Bosch or similar.

The property has 3 bedrooms, all with a dressing room and private bathrooms with a shower or bathtub. The bedrooms have parquet flooring in oak wood and each has an individual thermostat to control the temperature of the room independently.

Like the other apartments of the development, this one has the best quality finishes and an exquisite design to maximize comfort. Among the noteworthy features are the secure entrance door and the air conditioning which works by means of a system of aerothermia of high energy efficiency, controllable by the individual thermostats and the automated home system that will be installed. In addition, the price includes a storage room for private use and a bicycle space on the ground floor.
